

Eduardo Tacorda

Full Stack Developer

Wawa II Rosario, Cavite

0946-541-9569

eduardotacorda15@gmail.com

Detail-oriented Full Stack Developer with hands-on experience in both front-end and back-end technologies. Adept at creating efficient and user-friendly systems, improving workflows, and delivering robust solutions. Seeking a role to leverage my skills in developing innovative web applications and enhancing system performance.

Work Experience

M.A Technology, Inc.

04/2024 - Present

Full Stack Developer

- **Developed and Implemented Production System:** Design and built a custom system to streamline production processes, enhancing efficiency and creating a more user-friendly experience for workers and end-users.
- **Provided Ongoing System Support:** Delivered comprehensive support for existing systems, guiding users in their understanding and utilization of the technology, ensuring smooth operations and maximizing productivity.

Hayakawa Electronics Philippines Corporation (OJT)

10/2023 – 02/2024

Web Developer

- **Developed IT Support Request System:** Created and deployed a web-based application to replace the manual IT support request process, significantly improving efficiency by allowing users to submit and track support requests online.
 - **Streamlined Approval Workflow:** Integrated an email notification system to alert supervisors of pending requests, ensuring prompt approvals and reducing delays in the support process.
-

Projects

PR – PO System (Freelance)

7/2024

- **Designed and Developed PR-PO System:** Created a comprehensive Purchase Request and Purchase Order (PR-PO) system to streamline the procurement process, enabling efficient tracking and management of requests and orders.
- **Enhanced Workflow Automation:** Implemented features that automated approval workflows, reducing manual effort and minimizing errors, thereby improving overall operational efficiency.

Kanban System (Personal Project)

12/2023 - 02/2024

- **Developed Kanban Board System:** Created a dynamic task management system resembling a Trello board, allowing users to easily add, remove, and organize tasks with a drag-and-drop interface.
- **Enhanced Task Management Flexibility:** Implemented features that enable seamless interaction with tasks, improving the user experience in managing workflows and project tasks.

NSTP Student Portal (Capstone Project)

06/2023 – 12/2023

- **Developed NSTP Registration and Student Portal:** Created an online platform for NSTP students to register, choose program components, and manage their profiles, enhancing the registration and administration process.
 - **Implemented Advanced System Features:** Integrated QR code-based student ID generation for streamlined attendance tracking, a virtual learning page for accessing course materials and tracking progress. The system also supports automatic time tracking, and full mobile compatibility.
-
